

MOBILSENS TECHNOLOGIES

All Magnetic Solution Provider

WHO WE ARE

MOBILSENS Technologies is a professional magnetic technology solution engineering consultant and turnkey solution service company composed of specializing in the field of magnetic materials. We've been committed to design, manufacture, sales variety of measurement systems, magnetic field analysis and calibration systems. Our team has relevant experience in compliance with **ISO 17025** testing and calibration laboratory capabilities, as well as **IATF 16949** automotive and motorcycle parts manufacturing experience, implements **ISO 9001:2015** quality management system specifications.

TECHNICAL CAPABILITY

- 2018 “Magnetic torque sensing device for steering system”(Patent NO.: I577977)
- 2019 “Magnetic sensing device”(Patent NO.: I663382)
- 2021 “A Design Method Magnetic Field Generating Device”(Patent NO.: I725872)
- 2021 “Magnetic Field Generator with Magnetic Flux Guide Structures”(Patent NO.: I738617)
- 2022 “Electromagnetic Field Magnetic Field Generating Device”(Patent NO.: I754544)
- 2022 Technical Journals of **IEEE Access** is “*Design of the Stable Homogeneous Magnetic Field Calibration Device Generated by the Circular Coils*”(Vol.10,P.103401-103410)

Magnetization System Manufacture

- Suitable for all kinds of magnets
- Coil customized design
- Experiment / Development / Mass production

Magnetic Flux Measurement

- Magnetic line measurement
- Single axis /3 axis applicable
- Pole / Angle / Flux density Dipole moment

Electromagnet Field Calibration

- Automatic program control
- Standard magnetic field
- Integration of high and low temperature
